WELCOME TO
GTC PROTOCOL

THE NEW DECENTRALIZED FINANCIAL ENGINE

GTC Protocol is a next-generation decentralized financial protocol built for a borderless digital economy — introducing a new approach to DeFi through zero initial supply, smart minting, controlled burning, transparent on-chain mechanics, and community-driven infrastructure.

BUILT FROM THE GROUND UP.

ZERO INITIAL SUPPLY

A new protocol structure designed to begin without a pre-existing initial supply

SMART MINTING & CONTROLLED BURNING

Protocol-driven supply mechanics powered by predefined smart-contract logic.

ON-CHAIN TRANSPARENCY

Core mechanics operate through transparent and verifiable Blockchain infrastructure

RENOUNCED OWNERSHIP

A decentralized architecture designed without ongoing centralized ownership control

BORDERLESS INFRASTRUCTURE

An open Network built for global participation and decentralized

PROTOCOL-DRIVEN ARCHITECTURE

Core functions are structured through smart-contract logic rather than centralized intervention.

OPEN BY STRUCTURE. TRANSPARENT BY DESIGN. DECENTRALIZED BY NATURE

REBUILD THE DECENTRALIZED FUTURE

GTC PROTOCOL ECOSYSTEM FLOW

01 CONNECT WALLET
Connect your Web4 wallet to access the GTC Protocol ecosystem

02 ENTER THE NETWORK
Interact with an open and transparent decentralized environment.

03 SMART-CONTRACT EXECUTION
Protocol functions operate through predefined on-chain logic.

04 MINT MECHANISM
Supply creation is governed by the protocol's defined minting structure.

05 BURN MECHANISM
Supply reduction follows the protocol's predefined burn structure.

06 ON-CHAIN ACTIVITY
Core protocol operations remain verifiable through blockchain data.

07 COMMUNITY PARTICIPATION
A borderless ecosystem designed for decentralized communities.

09 PROTOCOL TRANSPARENCY
Track and verify relevant protocol activity through on-chain infrastructure.

ONE NETWORK. ONE OPEN ARCHITECTURE. A DECENTRALIZED FUTURE.

TOKEN MINTING & BURNING

A SMART-CONTRACT-DRIVEN SUPPLY ARCHITECTURE

TOKEN MINTING
New tokens are created through predefined protocol rules.

TOKEN BURNING
Tokens are permanently removed through the defined burn mechanism.

ON-CHAIN EXECUTION
Minting and burning operate through transparent smart-contract logic.

PROTOCOL-DRIVENSUPPLY
Supply mechanics are structured by the protocol.

MINT + **MANAGE** + **BURN**

OPEN. TRANSPARENT. ON-CHAIN. DECENTRALIZED.
GTC PROTOCOL THE NEW DECENTRALIZED FINANCIAL ENGINE.

MINTING & BURNING MECHANISM

Every protocol interaction follow on-chain supply mechanism.

MINT SIDE — PROTOCOL MINT

- Supply is created through protocol-defined rules
- Minting occurs through smart-contract logic
- Fully transparent and verifiable on-chain

BURN SIDE — PROTOCOL BURN

- Supply is permanently removed through the protocol
- Burn mechanism supports supply control
- Executed transparently by smart contract

GTCPROTOCOLvsTRADITIONAL MODELS

GTC PROTOCOL

Zero Initial Supply Mint & Burn Architecture

- Supply begins from zero
- Protocol-driven mint & burn
- Smart-contract based structure
- On-chain transparency
- Decentralized architecture

TRADITIONAL MODELS

MODELS Pre-Minted Allocation-Based Structure

- Pre-minted supply
- Centralized allocation structures
- Reserved supply models
- Limited transparency

IMPORTANT NOTE:
Reward is calculated once on the qualifying direct referral deposit.
Eligibility is subject to GTC Protocol rules.

LEVEL INCOME

Direct Referral Reward Levels

Direct referrals earn an additional 5% of team income. As the number of direct referrals increases, the eligible reward depth also increases, creating multi-generation and long-term team rewards.

Direct Referrals	Eligible Reward Depth (Team Income Across)
1 Direct Referral	2 Generations
2 Direct Referrals	4 Generations
3 Direct Referrals	6 Generations
10 Direct Referrals	20 Generations
12 Direct Referrals	25 Generations

RANK CONDITIONS :-

1. Earn Ranking Rewards through your network’s decentralized activity and protocol participation.

2. Ranking Rewards are based on qualifying activity across your network — as your network grows, your rank progresses according to defined conditions.

3. Small Leg Requirement supports balanced development across multiple legs.

4. Open Participation — begin with just 100 USDT Self Investment and progress through the GTC Protocol rank structure.
